

Neubus, Inc. Earns ISO 9001:2008 Certification

Neubus, Inc., the market leader in helping government agencies capture, store, manage, and share documents and information, achieved ISO 9001:2008 certification on September 30, 2012-Certificate number FS 585802. ISO 9001 is an internationally recognized standard which is the basis for certification of a company's quality management system and was first released in 1987. Neubus feels that by maintaining these standards and employing continuous improvement techniques their products and services will exceed the client's specifications. The quality management system is applicable to document imaging and disposition at Neubus' production facility.

Neubus earned their ISO 9001:2008 certification after successfully passing an audit of its quality management system in their production facility by the British Standards Institute (BSI). Since its foundation in 1901, BSI has grown into a leading global independent business services organization providing standard-based solutions in more than 140 countries. As the founders of the first quality management system standard BS 5750, the forerunner to the ISO 9000 series, and a continued key member of the ISO 9000 technical committees, BSI's knowledge and experience of the standards spans over 100 years with 66,000 organizations. ISO 9001 is the world's most established quality framework. It is used by over 750,000 organizations in 161 countries and sets the standard not only for quality management systems but also for management systems in general.

According to their Quality Policy, "Neubus Inc. is committed to delivering a quality product that meets or exceeds our customers' requirements and conditions. We strive to produce a defect free and competitively priced products and services by employing continued improvement techniques. Neubus Inc. is also committed to comply with the quality management system requirements of ISO 9001:2008 and to continually improve the effectiveness of the quality management system."

"Becoming ISO 9001:2008 certified represents our strong commitment to our customers and that we are focused on delivering the highest quality products and services. With the quality management system comes many best practices to ensure the effectiveness and efficiency of our processes," said Operations Manager Theresa Bernardy, who led the company's certification initiative. Bernardy also adds, "Neubus has been the leader in digital imaging for over twelve years. By becoming ISO 9001:2008 certified, we now have the leading edge in a competitive market. We have an approved quality management system

that sharpens our focus on continual improvement assuring the quality of the products that we provide to our customers.”

With the ISO 9001:2008 certification in place Neubus now has the competitive advantage, improved business performance, and streamlined operations. This certification translates into a benefit for Neubus’ clients.
